SKILLS:

- Technical Skills:
 - ✓ Subject: Database Management System (DBMS), Data Structures & Algorithm (DSA), Object Oriented Programming (OOPM), Agile
 - ✓ Programming Languages: - Java, Python, HTML5, CSS, Bootstrap, Kotlin
 - ✓ Databases & Platform Tools: - Firebase, Phpmyadmin, SQL, Android Studio, VScode, Linux, Git, XAMPP
- Soft Skills:
 - ✓ Proficient in Problem Solving, critical thinking, task Management skills and Communication Skills.

EXPERIENCE:

1. **DIGITAL SHIFT** | Android Development Intern DEC 2021 – JAN 2022
 - I used Figma's illustrative design tool for displaying layouts that were required to be developed and examined in the android studio according to the user's requirements. Have implemented and tested more than 30 screens. Moreover, I integrated the backend and API calls of the database into the developed design component for the successful workflow of the system.
2. **THE WOKEN MIND** | Android Development Intern NOV 2021 – JAN 2022
 - Worked on the backend of the app by adding components and resources on cloud firestore and Firebase. Additionally, designed various screens and layouts for better user experience and interaction.
 - Also contributed to the development of the product and business model of the application.

PROJECTS UNDERTAKEN:

1. **India's Export (Informative Website) :**
 - Indian Export is an informative website that deals with the Indian trade, which is happening around the world and provide easy accessibility of knowledge and information regarding trade, GDP, and imports of different countries of various categories of products to users. It is made using techstack like Html, CSS, JavaScript, Bootstrap, MySQL, Phpmyadmin, and XAMPP.
 - Consists of an Admin panel and a user interactive interface. A person can login as an admin and can make changes from the frontend part of the admin panel and all the changes will be visible to the users on the homepage of the website.
2. **CODEFREAKZ :**
 - Codefreakz is an app that can help you to enhance your coding skills and will provide you guidance to become a pro in any techstack. It consists of best possible roadmaps, frequently asked interview questions, best notes to follow and all underrated tech informative instagram, telegram, discord channel links and all recommended courses to follow for understanding any programming language or development skills.
 - This app is made using kotlin and its built using libraries like intent, coroutines, recyclerview, etc for the smooth functioning of the app. Link to the app : [Codefreakz](#)

CERTIFICATIONS & ACTIVITIES:

- Became the Campus Ambassador of E-CELL, IIT Bombay for the year 2021
- Completed certifications of Cisco courses ~ CCNA, DEVOPS, LINUX
- Certified by Oracle on Java Foundations Course and Completed AWS certification on Amazon Elastic Compute Cloud (EC-2)
